PROFESSIONAL SUMMARY

Full-stack developer who loves building complex, data-driven web applications from the ground up. I enjoy bridging the gap between robust backend systems and highly interactive user interfaces. Whether I'm spinning up Python AI microservices or crafting smooth UI animations with Next.js, my focus is always on writing clean, scalable code and delivering a polished user experience.

EDUCATION

Bachelor of Engineering in Computer Engineering

2024 – 2028 (Expected)

LJ Institute of Engineering and Technology (LJIET), Ahmedabad, Gujarat

- Focus on Software Development, Web Development, and System Design.

Bachelor of Science in Data Science

2024 – 2026 (Expected)

Indian Institute of Technology Madras (IIT Madras) - Online Degree Program

- Specialization in Data Analytics, Python Programming, and Machine Learning.

TECHNICAL SKILLS

- Languages:** TypeScript, JavaScript, Python, Rust, Java, HTML5, CSS3
- Frontend Frameworks:** React.js, Next.js (App Router), Tailwind CSS, Framer Motion, Zustand
- Backend & APIs:** FastAPI, Node.js, RESTful APIs, Supabase
- Tools & Platforms:** Tauri, Git, GitHub, Vercel, PostgreSQL, MongoDB

PROJECT EXPERIENCE

Aeres-IDE Implementation

React, Tauri, Rust, Monaco

- Built an ultra-fast, cross-platform local workspace utilizing React and Tauri, reducing application startup time by 40% compared to standard Electron alternatives.
- Integrated autonomous LLM agents (Groq) to enable real-time codebase refactoring, tracing, and intelligent code generation with sub-200ms latency.

Gurukul Classes Platform

Next.js, TypeScript, FastAPI, MongoDB

- Engineered an enterprise-scale educational management system capable of handling 500+ concurrent sessions by integrating a Next.js frontend with Python AI microservices.
- Leveraged Pusher for real-time interactivity and Framer Motion for premium UI animations, optimizing client-side rendering performance.

MediBot V2 Frontend

Vanilla JS, Web Audio API, TailwindCSS

- Built a highly dynamic client interface leveraging the Web Audio API to process live audio streams via AnalyserNodes with zero perceived lag.
- Engineered real-time biological SVG facial animations, dynamically mapping audio frequencies directly to complex vector physics at 60 FPS.

Innov8 Jewels (E-Commerce Web App)

Next.js 14, Supabase, Tailwind, Zustand

- Developed a full-stack luxury jewellery platform utilizing the Next.js 14 App Router and Supabase (PostgreSQL) for robust, high-volume data handling.
