

Patel Shlok Umesh

Full Stack Developer Intern | Backend Developer | Java Developer

Results-driven Full Stack Developer Intern with hands-on experience building scalable, AI-powered, and database-driven applications. Strong expertise in Java, Python, React.js, RESTful APIs, and SQL-based database systems. Experienced in backend architecture, API design, authentication systems, and modular application development.

LAN-SHLOK

Ahmedabad, Gujarat, India

TECHNICAL SKILLS

Programming Languages	Web Technologies	Databases & Tools
Java Python JavaScript	React.js FastAPI Flask RESTful APIs HTML5/CSS3 Tailwind CSS Bootstrap	PostgreSQL MySQL SQLite Git/GitHub Data Structures Algorithms OOP

EDUCATION

Bachelor of Engineering in Computer Engineering

LJ Institute of Engineering and Technology (LJIET) 2024 – 2028 (Expected) Ahmedabad, Gujarat

- Focus on Software Development and System Design
- Relevant Coursework: Data Structures, Algorithms, Database Management, Web Development

Bachelor of Science in Data Science

Indian Institute of Technology Madras (IIT Madras) 2024 – 2026 (Expected) Online Degree Program

- Specialization in Data Analytics and Machine Learning
- Relevant Coursework: Python Programming, Statistics, Machine Learning

PROJECT EXPERIENCE

Full Stack Developer

MediBot - AI Medical Assistant Academic Project 2025 – 2026

Keywords: React.js, FastAPI, PostgreSQL, Python, REST API

- Engineered a full-stack AI healthcare assistant using React.js frontend and FastAPI backend, serving 100+ test users
- Developed 15+ RESTful API endpoints with structured validation and scalable backend architecture
- Implemented vector-based semantic search algorithm for contextual medical response retrieval with 85% accuracy
- Designed optimized relational database schema reducing query time by 40% for efficient data storage
- Integrated authentication system using JWT tokens for secure user access management

Software Developer

NeonPulse - Desktop Music Player Academic Project 2025

Keywords: Java, JavaFX, SQLite, OOP, MVC Pattern

- Developed a JavaFX desktop application using object-oriented programming principles and MVC architecture
- Implemented SQLite database integration for persistent playlist management supporting 1000+ songs
- Applied modular architecture separating UI, business logic, and database layers for maintainability
- Created custom audio processing algorithms for enhanced playback quality and user experience
- Packaged deployment-ready executable build with automated installer for Windows and Linux platforms

ADDITIONAL PROJECTS

Portfolio Website

React.js, Tailwind CSS - Deployed on Vercel

RESTful API Development

FastAPI, PostgreSQL - 20+ endpoints

CERTIFICATIONS

IBM

HTML, CSS, and JavaScript (2025)

University of Pennsylvania

Data Structures in Java (2025)

Database Design Projects

SQL, PostgreSQL - Complex schema design

Algorithm Implementations

Java - Data structures and algorithms

LearnQuest

Introduction to Java (2025)
